

Positive-time local hit on the machine-AGV island

Plant graph is not a terminal SCC: C can still move.

$$\theta^L = 0.537, \theta^B = 7/12, m = 3.596 \text{ (64 states).}$$

Time-zero clothing (retained, not overwritten): already in D^L at $t = 0$ ($\theta^L = 1, m = 0$).
